Chatgpt was only used in the following prompts to generate worker icons.

This is my current map for my game Santorini. I want upgrade the background of my game. Specifically the Ocean and Ground tiles.

Could you please generate me some textured patterns I can use as the background?

I love the water and ground images.

Could you create me something similar for the Santorini workers as well.

I need three sets of Male and Female workers  
One Red set, One Blue and One Brown.
